The Accuphase E270 is the gateway into the Accuphase sound it has their revolutionary AA V A volume control. A power amplifier section featuring high power transistors in parallel push-pull configuration, complemented by a robust power supply and low impedance output stage. 120 watts of quality power into 4 ohms, with a damping factor of 400.

Accuphase E270 Integrated Amplifier - Doug Brady HiFi

The E-250 sounds warm, slightly "bear-like", at least compared with the E-260. The new amplifier has a much better defined bass and is much more focused on individual sounds, instruments and planes. Hilary Hann's violin with the E-250 occupied much more space between the speakers and seemed to be (but only in comparison!) somewhat dim, as if missing something 'central', as if the instrument edges were blurred.

However, it seems that only models built like "instrumentation amplifiers" (again Accuphase jargon) can be called fully balanced designs. However, this is can be deceiving. For example, the E-550 model which is not an instrumentation amplifier design is superior to models like E-250, E-350 and E-450 which are designed as instrumentation amplifiers.

The subject of this review is the Accuphase E-550 line-stage integrated amplifier. The phase-accurate Accuphase of Japan has been producing award-winning amplifiers since its founding in 1972, and that majestic power meter in gold chassis design has become the arresting visage of all Accuphase amplifiers shortly after.

Accuphase E-550 Integrated Amplifier Review - Dagogo

As a first in an integrated amplifier, the E-650 features the sophisticated balanced AAVA type volume control incorporated in Accuphase's top-of-the-line preamplifier model C-3850. Balanced AAVA uses two AAVA circuits driven in a fully balanced configuration. This completely cancels out any external noise and results in unsurpassed S/N ratio.

Accuphase E-650 Class A Integrated Amplifier

Accuphase offers two amplifier technologies, Class A/B and Class A, with the Class A models positioned at the upper end of the product range in terms of performance and price. Until the recent introduction of the 50W E-800, the E-650 was the flagship integrated amplifier, offering a conservatively-rated 30W per channel into an 8Ω load ...

It's eleven years since I reviewed the Accuphase E-213 for this magazine. That was then the entry-level integrated amplifier; the next model up the line, the E-308, was similar in rated power output but a noticeably more accomplished performer, and represented quite a significant jump in performance, back in the
