Math 324: Advanced Multivariable Calculus Notes Samantha Fairchild To do this, look at the outside integral. The variable is in x , and the bounds are between 0 and 1. So $0 < x < 1$. Now looking at the inside integral, the variable is y , and $x < y < 1$. Putting these two equalities together, we obtain $0 < x < y < 1$:

Calculus showed us that a disc and ring are intimately related: a disc is really just a bunch of rings. This is a recurring theme in calculus: Big things are made from little things. And sometimes the little things are easier to work with. A note on examples. Many calculus examples are based on physics.
