An alternative to using gas, electricity, oil or LPG to heat your home is to install a biomass or wood heating system. These burn organic material, such as logs or wood pellets, to provide heat and hot water. Most people buy a wood burning stove to help make their living room more cosy.

The Best Heating For Your Home - Which?

Opting for a heat pump, or a hybrid heat pump, is the best option if you have outside space. In our well insulated pre-1900 house we've fitted an air-source heat pump and a hot water cylinder (although in hindsight I wish we'd fitted a heat battery instead). For a more modern house an air-source heat pump would also be perfect.
