About this book. This valuable resource covers the principles of analytical instrumentation used by today's chemists and biologists and presents important advances in instrumentation, such as the drive to miniaturise and lab-on-a-chip devices. In terms of the lab-based analytical instrumentation, the five main categories of technique—spectroscopic, chromatographic, electrochemical, imaging and thermoanalytical, are included and presented in a practical, not theoretical way.

The market for analytical instrumentation in the oil & gas industry crashed due to the Coronavirus 2019 (COVID-19) induced slowdown that caused a decline in oil prices due to oversupply and less demand. The global demand for gas is expected to peak in 2026 and surpass that for oil, making it the world's primary energy source.
