AP Biology Lab 11 - Animal Behavior. Paul Andersen introduces the concept of ethology and contrasts kinesis and taxis. He explains the importance of courtship rituals in fruit flies. He finally shows you how to use a choice chamber to study behavior in pill bugs.

AP Bio Lab 11 - Animal Behavior — bozemanscience

Lab 11 Animal Behavior Introduction: Ethology is the study of animal behavior. An animal's behavior is its response to sensory input. There are three types of behaviors: orientation, agonistic, and mating. Orientation behaviors take the animal to its most favorable environment. Taxis is when an animal moves toward or away from a stimulus. ... Continue reading "Lab 11a Behavior Ap"

Ap Biology Lab 11: Animal Behavior Essay - 605 Words

AP Biology Lab 11: Pre-Lab Animal Behavior Background Perhaps one of the most difficult fields of biology to study is ethology, the study of animal behavior. Observation of a behavior is simple; interpreting what has been observed requires more effort; therefore, more than any other division of research in biology, ethology calls for patience, objectivity, and imagination.
