Applied weed science : including the ecology and ...

Weed control is important in agriculture. Methods include hand cultivation with hoes, powered cultivation with cultivators, smothering with mulch, lethal wilting with high heat, burning, and chemical control with herbicides (weed killers).

Weed control - Wikipedia

But neither basic nor applied weed science is value free; they are value laden. Operative values include meeting basic human needs through improved food production, promoting the common good through abundant food, improving people's lives through efficient production of safe food, achieving agricultural sustainability, and increasing efficient food and fiber production and farmer profit.
