Twenty years ago, Professor Herbert Begemann dedicated the foreword to the first edition of this hematology atlas. He acknowledged that—beyond cell morphology—this atlas aims at the clinical picture of patients. We are grateful for being able to continue this tradition, and for the impulses from our teachers and companions that make this possible.

An introduction to our technology In most hematology labs, cell differentials are performed using manual microscopy. But this traditional process is not without its limitations. Our innovative technology replaces manual microscopy and transforms the process of performing blood and body fluid differentials.
