compounds while the biochemistry deals with the chemistry inside the living beings. So organic chemistry is more or less related to chemistry while biochemistry is related to biology. But when we see the chemical substances involved in both of these subjects, it seems both of them are similar and not different.

Organic Chemistry and Biochemistry | Similarities ...

Biochemistry is the study of chemical compounds and reactions which occur in living organisms. It overlaps extensively with organic chemistry since most compounds in living cells contain carbon. Biochemistry involves the study of carbohydrates, lipids, proteins and nucleic acids, which are the types of molecules involved in the chemistry of living organisms.
