Seed that isn't stored well can spoil and be invaded by pests such as mice, rats, larvae, silverfish, earwigs, or moths. As seed gets old and dries out, it is also less nutritious and will not attract as many birds. If water gets into the seed, mold can grow that can make birds sick and the strong smell may attract even more unwanted pests.

## **Top 10 Backyard Bird Feeding Mistakes - The Spruce**

When you start to take note of the birds around you, you might find yourself more perceptive of other things. You might notice sounds you previously overlooked. You might start to notice small details in your surroundings, like individual trees, insects, fruits, and flowers. You might find yourself more in tune with the passing of the seasons.

## **Birding For Beginners (U.S. National Park Service)**

In spring, most of the food in the wild, such as all of the seeds and berries, has been eaten during the winter, and new insects are only just beginning to fill the air, so birds-both year-round residents and returning migrants-especially need feeder foods in spring. In summer, birds are raising young, and this takes a lot of effort.
