Own Ship's Position The source can be any one of the following: (DGPS), (GPS). If there is a Position alarm, the lat/ion is displayed in RED.

BRIDGE MASTER E RADAR OPERATING INSTRUCTIONS

Main Features of the Tactical Display. The BridgeMaster E tactical display is the first marine radar system in the world that is able to display inputs from two totally asynchronous radar heads simultaneously in the same video circle. This advanced radar system combines unique naval features with powerful configurations and options that far exceed those of its predecessor.

Tactical Display | Sperry Marine

Under the four-year contract, the ships' existing navigation radars will be replaced by Sperry Marine's BridgeMaster E 340 radar systems, including commercial, navalized and tactical variants, in X-band, S-band and dual-band configurations. The contract includes training, spares, installation, engineering and project-management support.

Bridgemaster E Radar Manual

The BridgeMaster E naval radar range incorporates a number of transceiver options. In addition to the usual S (E/F)-band and X (I)-band, masthead option, the series includes commercial off-the- shelf (COTS) units, units with additional features and full naval transceivers. All transceivers in the range operate using standard commercial features and therefore appear to potentially hostile targets to be merchant radars rather than military.

Transceivers Features | Sperry Marine

The standard BridgeMaster models include clutter suppression capabilities unequalled in other marine radars, and with BridgeMaster E there is the option of fitting "Vision", a revolutionary new clutter suppression system. This provides the first true hands-off clutter and gain control capability. "Vision" allows the operator to...
