Before you are able to change the lawn mower oil on your Briggs & Stratton® small engine, it's important to understand the oil type and capacity required. The type of equipment you use, the engine within, and the temperature outside determines what type of oil to use, how much you need and the cost of the oil.

An overheating Briggs and Stratton engine can have a number of causes. The engine may be dirty and require the removal of dirt and debris during a thorough cleaning. The engine may also be low on oil or need the air-fuel mixture adjusted upward. A leaky gasket may also require replacement to prevent further overheating issues.
