Last update: 11/29/17, 5am PT: The launch of Intel's latest (8th generation) Core processors, Coffee Lake, is here, and we've been busily covering it from a variety of angles.

Everything You Need To Know About Intel's Coffee Lake ...

5) RAM. Just like with the previous Coffee Lake build, you will need to go for DDR4 memory, and depending on whether you are building a full tower build or a compact build, you will need to get between two to four RAM sticks. Personally, I would go for at least 32 GB of RAM (choose 2x16 GB sticks for either build).
