No amount of aerobic activity, yoga, or calisthenics will build your butt ("glutes"). It's all about using heavy weight as per a proper bodybuilding program. Not aerobic bodyweight exercises. Those are a scam when it comes to building muscle mass. Specifically, the squat exercises you'll be doing are responsible for building glutes.

The Science of How to Build Muscle: Full Guide

The scientific method is a systematic way of learning about the world around us and answering questions. The key difference between the scientific method and other ways of acquiring knowledge are forming a hypothesis and then testing it with an experiment.

The athletes competed in 43 events covering athletics (track and field), cycling, swimming, gymnastics, weightlifting, wrestling, fencing, shooting, and tennis. A festive atmosphere prevailed as foreign ...

Olympic Games - History of the modern Summer Games ...

Science is complex and multi-faceted, but the most important characteristics of science are straightforward: Science focuses exclusively on the natural world, and does not deal with supernatural explanations.. Science is a way of learning about what is in the natural world, how the natural world works, and how the natural world got to be the way it is.

Understanding Science: An overview

Understanding Science. Science is generally not swayed by opinion or conjecture, but rather by new research based on facts that can evolve or disprove results from earlier scientific studies. Scientific discoveries occur frequently in fields of engineering, technology, space exploration, transportation, finance, and more.
