CVX is not meant for very large problems, so if your problem is very large (for example, a large image processing or machine learning problem), CVX is unlikely to work well (or at all). For such problems you will likely need to directly call a solver, or to develop your own methods, to get the efficiency you need.

The CVX Users' Guide

The `cvx_solver` command is case insensitive, so `cvx_solver SeDuMi` will work just fine as well.. If you issue this command inside a model—that is, between `cvx_begin` and `cvx_end` it will change the solver only for that model; the next model will use the previous choice. If, only the other hand, you issue a `cvx_solver` command outside of a model, it will change the solver used for the remainder of ...
