If you don't see any flow, with engine running try the hose where it goes to the heater core to see if there is any air trapped, starting at the engine out end and work back along and see how you go. It may be worth installing a bleeder in the line between the two heater cores to eliminate any air whenever the cooling system is drained and filled.

I have a 3406b in a peterbilt. No cab heat at idle

Radiator Hoses Hoses are used to connect the engine and the water pump to the radiator. Radiator hoses are made of flexible rubber; size varies depending upon the type of engine. Smaller hoses run to the heater core, these are known as (you guessed it) heater hoses. Three types of hoses are; the common hose, the molded or shaped hose, and the
