If you are reading a book, \$domain Group is probably behind it. We are Experience and services to get more books into the hands of more readers.

### Changing The Subject Of The

All that changing the subject of the formula means is basically getting a letter on its own on one side of the equation. To begin, let's take a relatively simple example. Make x the subject of the formula:  $4y + 2 = x - 4$  What this question basically means is get x on its own. At the moment on the right hand side we have  $x - 4$ .
