Changing Valency edited by R. M. W. Dixon

In linguistics, valency or valence is the number and type of arguments controlled by a predicate, content verbs being typical predicates. Valency is related, though not identical, to subcategorization and transitivity, which count only object arguments - valency counts all arguments, including the subject.The linguistic meaning of valency derives from the definition of valency in chemistry.

In languages that contain them, verb-internal subject/object agreement affixes are normally a purely grammatical affair. But the morphological patterns that create distinctive transitive and intransitive verb stems are derivational. The dependence of a verb's grammatical properties on derivational processes of stem creation is particularly interesting when valency-changing mechanisms are ...
