Normal Physiology. The brain and spinal cord are surrounded by protective membranes known collectively as the meninges. As seen in Figure 1, the meninges are made up of three membranes, the dura mater, the arachnoid mater, and the pia mater. The outermost membrane, the dura mater, which translates to "hard mother", is the thickest and toughest of the meningeal layers.

Pathophysiology | Meningitis

- Pathology is important to diagnose using the clinical signs and via sample examination. However, pathophysiology could be performed based on pathological findings.
- Pathophysiology always done comparing the normal healthy functions studies from bottom to top of a disease, whereas pathology goes from top to bottom.
