## **Consciousness: New Philosophical Essays by Quentin Smith**

Consciousness Explaining the nature of consciousness is one of the most important and perplexing areas of philosophy, but the concept is notoriously ambiguous. The abstract noun "consciousness" is not frequently used by itself in the contemporary literature, but is originally derived from the Latin *con* (with) and *scire* (to know).

## **Consciousness | Internet Encyclopedia of Philosophy**

His work is commonly associated with the philosophical movement called "existentialism" and its intention to begin with an analysis of the concrete experiences, perceptions, and difficulties of human existence. Consciousness, the world, and the human body as a perceiving thing are intricately intertwined and mutually "engaged"

## **Phenomenal Concepts and Phenomenal Knowledge: New Essays ...**

Consciousness is a mongrel concept: there are a number of very different "consciousnesses." Phenomenal consciousness is experience; the phenomenally conscious aspect of a state is what it is like to be in that state. The mark of access-consciousness, by contrast, is availability for use in reasoning and rationally guiding speech and action.
