Posch Engineering

Seven furnaces with a combined 250 ton daily melting capacity are the life line of Gregg Industries' foundry operation. Bridge cranes and monorail hoists furnished and installed by Facilities Engineering not only move product through the foundry, but help to maintain the equipment as well.

Facilities Engineering

Crane Engineering is a leading distributor of industrial grade pumps, valves, seals, filters, and fluid process equipment in WI, upper MI and Midwest.

Crane Engineering | Fluid Handling Equipment & Service in ...

A crane is a type of machine, generally equipped with a hoist rope, wire ropes or chains, and sheaves, that can be used both to lift and lower materials and to move them horizontally. It is mainly used for lifting heavy things and transporting them to other places.

Crane (machine) - Wikipedia

Cranes All of our cranes are Engineered cranes which simply means that each and every crane is designed to meet your specific application. Most of our competitors today have evolved into selling kit cranes which come as a pre-manufactured set of components and controls which are not easily modified to meet specific needs.

Cranes - Stewart Engineering and Sales co.

Some of the best-known companies in the world choose EMH. Founded in 1988, EMH quickly evolved into a full line, one-source manufacturer of overhead cranes and components. Our 125,000 square foot state-of-the-art manufacturing facility allows us to manufacture our products in the most efficient and cost-effective manner possible.

One-Source Manufacturer of Overhead Cranes and Components ...
