Cat fuel injectors deliver to your internal combustion engine the correct amounts of fuel at the right moments for prime performance.

Fuel Injectors | Cat® Parts Store

A diesel fuel lift pump is a priming pump that transfers fuel from the tank to the fuel injection system. They are called lift pumps, because in most equipment the tank is located below the engine, the fuel has to be lifted up from the tank to the engine. There are three common types of fuel priming pumps:

Among modern tractors, the High Drive (elevated sprocket) design is unique to Caterpillar products. The concept originated in 1914 with Caterpillar predecessor C. L. Best Tractor's 30 Humpback; [citation needed] this tractor was discontinued a year later, and the only other tractor to use the concept until the D10's introduction was the Cletrac Model F, built between 1920 and 1922.
