Db Link User Manual

A database link is a pointer that defines a one-way communication path from an Oracle Database server to another database server. The link pointer is actually defined as an entry in a data dictionary table. To access the link, you must be connected to the local database that contains the data dictionary entry.

Replica Set and Sharded Clusters¶ Replica Sets. At minimum, `db.dropDatabase()` waits until all collection drops in the database have propagated to a majority of the replica set members (i.e. uses the write concern "majority"). Starting in MongoDB 4.2, you can specify a write concern to the method. If you specify a write concern that requires acknowledgement from fewer than the majority, the ...
