DESCARTES' DREAM. from Descartes' Dream, by Phillip J. Davis and Reuben Hirsh. THE MODERN WORLD, our world of triumphant rationality, began on November 10, 1619, with a revelation and a nightmare. On that day, in a room in the small Bavarian village of Ulm, Rene Descartes, a Frenchman, twenty-three years old, crawled into a wall stove and, when he was well warmed, had a vision.

DESCARTES' DREAM

In Descartes dream argument, he states there are no reliable signs distinguishing sleeping from waking. In his dream argument, he is not saying we are merely dreaming all of what we experience, nor, is he saying we can distinguish dreaming from being awake.

The dream argument came to feature prominently in Mahayana and Tibetan Buddhist philosophy. Some schools of thought (e.g., Dzogchen) consider perceived reality to be literally unreal. As Chögyal Namkhai Norbu puts it: "In a real sense, all the visions that we see in our lifetime are like a big dream"

Dream argument - Wikipedia

According to Descartes' dream argument, there are no definite signs to distinguish dream experience from waking experience. Born in Touraine, France, René Descartes (1596-1650) was a highly influential philosopher, mathematician, and scientist.

In the Dream argument, Descartes argues that he often dreams of things that seem real to him while he is asleep. In one dream, he sits by a fire in his room, and it seems he can feel the warmth of the fire, just as he feels it in his waking life, even though there is no fire.

René Descartes (1596-1650): Themes, Arguments, and Ideas ...

The Dream Problem. Second, Descartes raised a more systematic method for doubting the legitimacy of all sensory perception. Since my most vivid dreams are internally indistinguishable from waking experience, he argued, it is possible that everything I now "perceive" to be part of the physical world outside me is in fact nothing more than a ...

Descartes: Overcoming Doubt

In the Meditations, Descartes uses dreams to motivate skepticism about sensory-based beliefs about the external world and his own bodily existence. He notes that sensory experience can also lead us astray in commonplace sensory illusions such as seeing things as too big or small.

Dreams and Dreaming (Stanford Encyclopedia of Philosophy)

In the Sixth Meditation, Descartes finally tried to eliminate the dream problem by proving that there is a material world and that bodies do really exist. His argument derives from the supposition that divinely-bestowed human faculties of cognition must always be regarded as adequately designed for some specific purpose.
