inventor and businessman who has been described as America's greatest inventor. He developed many devices in fields such as electric power generation, mass communication, sound recording, and motion pictures. These inventions, which include the phonograph, the motion picture camera, and early versions of the electric ...

Thomas Edison - Wikipedia

Since Tesla had redesigned the generators while working for Edison, he had no claim to the patent, and essentially got nothing out of the agreement (although Edison offered him a raise of \$10 per week. Tesla resigned on the spot). A few years later, Tesla built his AC induction motor, and the War of the Currents began.

Introduction of competing electric power transmission systems in the late 1880s and early 1890s. It grew out of two lighting systems developed in the late 1870s and early 1880s; arc lamp street lighting running on high-voltage alternating current (AC), and large-scale low-voltage direct ...

War of the currents - Wikipedia

However, Tesla developed an idea for a better system that utilized alternating current (AC), which could power large areas by switching, or alternating, the flow of charge along the way. Edison wasn't interested in Tesla's system, initially dismissing the idea of alternating current, describing it as "splendid" but "utterly impractical".
