Tides. Launch Gizmo. Gain an understanding of high, low, spring, and neap tides on Earth by observing the tidal heights and the positions of the Earth, Moon, and Sun. Tidal bulges can be observed from space, and water depths can be recorded from a dock by the ocean. Launch Gizmo.

Tides Gizmo : Lesson Info : ExploreLearning

In the Ocean Tides Gizmo, students will learn how the positions of the Sun and Moon create tidal bands that rise at opposite ends of the Earth, and how Earth's rotation through these bulges creates high and low tides. The tides are shown in both a global view and in a local scene of a fishing dock on the shore. A recent, growing concern is the increase of flood events along coastal areas during normal high tides, a phenomenon called "tidal flooding".

Gizmo of the Week: Ocean Tides | ExploreLearning News

Print Page ASSESSMENT QUESTIONS: Questions & Answers ± 1.

Based on the diagram below, what type of tide will the observer experience? A. neap high tide B. neap low tide C. spring high tide D. spring low tide Explanation: The position of the Moon relative to the observer determines whether it will be a high tide or a low tide. High tides occur at the points nearest and farthest from the Moon.

Tides Gizmo - ExploreLearning.pdf - ASSESSMENT QUESTIONS ...

Use the Gizmo to fill in the table, recording one high and one low tide each day. Calculate the range, the difference between high and low tide, for each day. Investigate: Tides with the largest range from high tide to low tide are called spring tides. Click Reset to observe the positions of the Sun, Earth and Moon during a spring tide.

ExploreLearning® is a Charlottesville, VA based company that develops online solutions to improve student learning in math and science.. STEM Cases, Handbooks and the associated Realtime Reporting System are protected by US Patent No. 10,410,534. 110 Avon Street, Charlottesville, VA 22902, USA

ExploreLearning Gizmos: Math & Science Simulations

World's largest library of math & science simulations. Gizmos are interactive math and science simulations for grades 3-12. Over 400 Gizmos aligned to the latest standards help educators bring powerful new learning experiences to the classroom.

ExploreLearning Gizmos: Math & Science Simulations

A new study from the University of Washington suggests that air pressure slightly increases when the moon is on the horizon, and slightly decreases when the moon is directly above. This change causes a tiny but measurable change in precipitation rates, which may be important in future climate models. The Tides Gizmo demonstrates high tides, low tides, spring tides, and neap tides.
