Genealogy is the study of one's family, the study of our ancestors—their birth, their childhood, their dreams, their marriages, their occupations, their children, their deaths. And because these things in the past all have an impact on the present, in a very real sense, genealogy is a study of one's self.

Using death records is a basic part of genealogy research. In fact, for many genealogists, it is the first type of record set they learn to use. This is because death records are readily available to the general public in most cases and because they usually contain a wealth of important family history information.
