11 Types of Apps You Can Build with Ruby on Rails

Leave tear strip intact for the non-curved areas. With a 4" or 5" taping knife, apply a smooth, liberal coat of all-purpose compound to corner. Press Arch-Flex firmly into compound to form a uniform curve. Wipe down tight and smooth with a 4" or 5" taping knife. Let dry completely.

Strait-Flex® Arch-Flex | ClarkDietrich Building Systems

Ruby on Rails is not the web server though, the web server can be anything from Webrick (what usually happens when you start a Rails server from the command line) to Apache HTTPD (the web server that powers most of the web). The web server is just a facilitator, it takes the request and hands it to your Rails application, which generates the ...

Louvered Deck Railings - FLEXfence Louver System

Time to generate our app. The rails command creates a base application structure. All we need to do is be in a directory and run it like so: `$ cd ~/projects $ Rails bookshelf #this will create a new directory named bookshelf that holds our app $ cd bookshelf`. It's important to note that the Rails default is an SQLite based app.
