Modern Arch started in 2004 with Dr. Art Wool and his daughter Suzanne. Working along side her father for many years, Suzanne's training of Othodontic practices and the supply business grew deeply. In 2013 she joined forces with her sister Kim following the loss of their father. Together their drive has grown Modern Arch to be one of the leading Orthodontic suppliers in the US.

Orthodontic products, supplies, and tools - Modern Arches ...

An archwire in orthodontics is a wire conforming to the alveolar or dental arch that can be used with dental braces as a source of force in correcting irregularities in the position of the teeth. An archwire can also be used to maintain existing dental positions; in this case it has a retentive purpose. Orthodontic archwires may be fabricated from several alloys, most commonly stainless steel, nickel-titanium alloy, and beta-titanium alloy.
