Firstly, we need a great business idea then comes the capital or money that we need to invest to buy the goods for our business. But how do we manage all of this? While business statistics helps in keeping a record of all the essentials involved in a business, business mathematics provides the tools one needs to study and manage these records. Now, here in this subject, we will be learning about these two domains along with their applications.

Statistics is the science of turning data into insights and ultimately decisions. Behind recent advances in machine learning, data science and artificial intelligence are fundamental statistical principles. The purpose of this class is to develop and understand these core ideas on firm mathematical grounds starting from the construction of estimators and tests, as well as an analysis of their asymptotic performance.
