The key to a successful future mobile communication system lies in the design of its radio scheduler. One of the key challenges of the radio scheduler is how to provide the right balance between Quality of Service (QoS) guarantees and the overall system performance.

### Future Mobile Communications - LTE Optimization and Mobile ...

But conventional communication systems, just as power grids, can be vulnerable to attack. Morgan O'Brien, chief executive officer of Anterix, believes utilities need broadband communications systems (using LTE technology) which stand alone, independent of all extant communications systems, whether dependent on the internet or optical fibers.

### Broadband Will Offer Safe Communications for Utilities as ...

VoLTE stands for 'Voice over Long Term Evolution'. Utilising IMS technology, it is a digital packet voice service delivered over IP via an LTE access network. Voice calls over LTE are recognised as the industry-agreed progression of voice services across mobile networks, deploying LTE radio access technology.

### GSMA | VoLTE (Voice over LTE) - Future Networks

In telecommunications, Long-Term Evolution (LTE) is a standard for wireless broadband communication for mobile devices and data terminals, based on the GSM / EDGE and UMTS / HSPA technologies. It increases the capacity and speed using a different radio interface together with core network improvements.
