What is 'fuzzy logic'? Are there computers that are ...

Fuzzy Logic is the description of an Algebra. Probability is one interpretation and application of Fuzzy Logic as a Fuzzy Logic. However, the phrase, "degrees of truth" has some misleading connotations. Fuzzy Logic is a class of logic systems that can range between 0 and 1, and does not specifically correspond to any particular meaning.

What is the difference between fuzzy logic and probability ...

Both degrees of truth and probabilities range between 0 and 1 and hence may seem similar at first, but fuzzy logic uses degrees of truth as a mathematical model of vagueness, while probability is a mathematical model of ignorance.
