A professional in occupational health psychology works for private or public organizations, many in consulting positions. They can explore how stress affects individuals and recommend stress reduction practices and coping mechanisms, and they change stressful environments through job reorganization.

Occupational Health Psychology | Psychology | ECU

From Wikipedia, the free encyclopedia. Occupational health psychology (OHP) is an interdisciplinary area of psychology that is concerned with the health and safety of workers. OHP addresses a number of major topic areas including the impact of occupational stressors on physical and mental health, the impact of involuntary unemployment on physical and mental health, work-family balance, workplace violence and other forms of mistreatment, accidents and safety, and interventions designed to ...
