1. Introduction: Some Historical Markers. Studies of newborn infants have historically been at the heart of a number of controversies (For a more complete history and presentation of different paradigms used in infancy research, see []).In Darwin's Theory of Evolution [], the characteristics of behaviors present in newborn infants could be ascribed to heredity, and those acquired ...

What do We Know about Neonatal Cognition?

Each field needs a taxonomy, or general structural model, of its subject matter. Much of my research has focused on the development of a general taxonomy of personality traits--the Big Five. As I have argued, the field of personality research has for years struggled with the question of what are the most important personality traits to study.

Research: The Big Five Model of Personality Traits

This chapter interrogates the challenges posed by the paradigm shift sought by the UN Convention on the Rights of Persons with Disabilities. The author explores three contrasting shifts that are present in the literature to date: from the medical model to the social model of disability; from best interests to 'will and preferences'; and from mental capacity to legal capacity.

Challenging capacity: shifting paradigms of intellectual ...

In the past 40 years of 'reform and opening-up' the tension between globalization and the development of nation-state is the main driving force behind the change in Chinese nationalist discourse. On the one hand, China should integrate into the world and respond to the challenges from the international community; on the other hand, it must pay attention to the social and ethnic dynamics ...
