of strangulation, and death can occur in just under five minutes. According to the Training Institute on Strangulation Prevention, nearly four in five victims of strangulation are strangled manually (with hands).

### **Strangulation Can Leave Long-Lasting Injuries**

## Download Free How Long Does Manual Strangulation Take

Strangulation is a form of asphyxia produced by a constant application of pressure to the neck. The three forms of strangulation are: hanging, ligature, and manual. Hanging occurs when a person is suspended with a ligature around his or her neck, which constricts due to the gravitational pull of the person's own body weight.
