The new guidelines focus on the LDL reduction from baseline. Moderate-intensity therapy reduces LDL by 30% to 49% and high-intensity therapy reduces LDL by 50% or more. According to the new guidelines, only 40- to 80-mg of atorvastatin daily or 20- to 40-mg of rosuvastatin daily provide high-intensity LDL reduction.

The New Lipid Guidelines: An In-Depth Look

By moving away from the connection between LDL and ASCVD risk and focusing on the efficacy of particular drugs per se, ATP IV departs markedly from previous cholesterol guidelines; this will continue as long as RCTs are the sole basis of these guidelines.
