Effective sales and operations (S&OP) planning can help you understand when you might need new equipment or overtime. Accurate forecasts help you plan inventory, so you have enough of the right products in place to meet demand. The S&OP process can provide insight into upcoming promotions, new product introductions or other demand changes.

Logistics Chain

Top-down planning is the simplest approach to sales and operations planning. In this approach, there is a single sales forecast that drives the planning process. The forecast is derived from a combination of products and services that require similar resources, for example, a number of manufactured finished products.
