LV7000 drives can save up to 50% in energy consumption. These drives operate in the entire power range from 1 to 2,000kW at 380VAC to 690VAC. Other benefits include minimizing downtime, increasing system reliability, improved process control and minimizing total installed project costs.

LV7000 Low Voltage Drive | Drive Systems | GE Power Conversion

GE's LV7000 common DC bus product portfolio meets industrial requirements with a flexible architecture, comprising a selection of active front-ends, non-regenerative front ends and inverters in the entire power range and voltages from 380V to 690V. Flexible Configuration, Customized Solutions

GE Industrial Solutions - ABB Group

A range of standard packaged drives, based on the LV7000-3 high performance control, are ready for use and complete with hardware to meet the needs of most basic drive systems. Compact and flexible
