Paleocology: Concepts and Applications / Edition 2 by J ...

Defining paleocology and its essential concepts and principles. An overview of the historical development of paleocology. Modern ecological studies and their application in paleocological reconstructions. Identification of invertebrate and vertebrate groups which are useful in paleoenvironmental interpretations.

GEOL 507 Advanced Paleontology (Paleocology)

Amino acid, organic nitrogen, and stable carbon isotope (13 C/ 12 C) profiles through a core from East Taihu Lake are interpreted in terms of paleocology and paleoclimate over the last ca. 15,000 yr. Lower amino acid contents and higher δ 13 C values at the base of the core represent a cool and arid climate, and coincide with low organic productivity.

Amino Acids and Stable Carbon Isotope Distributions in ...

Paleocology is the study of interactions between organisms and/or interactions between organisms and their environments across geologic timescales. As a discipline, paleocology interacts with, depends on and informs a variety of fields including paleontology, ecology, climatology and biology. Paleocology emerged from the field of paleontology in the 1950s, though paleontologists have conducted paleocological studies since the creation of paleontology in the 1700s and 1800s. Combining the inv
