A pet pigeon may live up to 15 years. However, feral pigeons have a lifespan of only three to five years. They may live longer in the wild if predation is low and humans leave them alone. Feral pigeons tend to live longer in areas where there are fewer humans, such as farms or suburbs, rather than downtown cities.

The Complete Guide to Feral Pigeons - Pigeonpedia

Pigeons and doves have for centuries been kept for use in competitive breeding, homing and in recent history, racing. However, it is a little known fact that they are also raised as pets. With good reason, they can be very affectionate and loyal, and millions of enthusiasts have learned to love and appreciate them as companion birds.

Pigeons such as Kings, Fantails, Tumblers and Homers are smart, beautiful and gentle birds. They've been selectively bred and tamed and, while they can't survive in the wild, they thrive as pets. Many pigeons (and other birds as well) wind up in animal shelters, either surrendered or found as strays, but they need adopters to get out alive.

Columba livia. Pigeons, also known as Rock Doves, are monogamous and will lay one to two eggs which hatch within eighteen days. Young are fed "pigeon milk" which is regurgitated food from both males and females. While mating occurs year round, the peak mating seasons are spring and fall. Pest Stats.

Pigeon Control Pest Guide: How to Get Rid of Pigeons

Pigeons do great indoors as family pets. They can also live outside in a predator & rodent-proof aviary but I would never make a single pigeon live outside alone. They are flock birds and to be outside alone is stressful and lonesome for a pigeon. A single pigeon living indoors adopts the people as flock members.
