A DEMOGRAPHIC EVALUATION OF UK PODIATRY SERVICES . METHOD . In order to determine the characteristics of the current patient population managed by UK podiatrists a survey questionnaire was developed to get a 'snap shot' of practice on one day (Appendix 1). The design was based on a previous survey of patient population characteristics [1]

A Demographic Evaluation of UK Podiatry Services

years or more of podiatric experience. • Overall, most podiatric practices were small. Most of the practices have only one or two doctors. The average partnership has 2 doctors and the typical podiatric medical group had 3 podiatrists. • The staff size of the typical solo practice was 3 staff in 2005 and 2007. The size of the

EXECUTIVE SUMMARY Major Findings General Practice Information

The current RN workforce doesn't reflect the increasing diversity of the population. Demands on nurse leaders include the ability to retain a skilled, engaged, and diverse staff. The leader's communication style directly influences the nurse leader-RN relationship, coordination of work, and RN satisfaction with the work environment.
