Rapid Reasoning Tests Non Verbal

Non-verbal reasoning tests assess a candidate's intelligence and ability to apply reasoning and logic. They require applicants to interpret visual information and recognise patterns and rules. This might include finding relationships between shapes and patterns, or recognising a visual sequence and identifying what will come next.

Non-verbal reasoning is an umbrella term that covers a wide range of psychometric ability tests such as inductive, logical, abstract, diagrammatic and spatial reasoning. The term is used to indicate that verbal competency is not necessary for, or assessed by, the test. Because of this, the tests are seen as particularly effective for international assessment, as candidates speaking a wide range of languages are able to access the same test material.
