Extreme value theory or extreme value analysis (EVA) is a branch of statistics dealing with the extreme deviations from the median of probability distributions. It seeks to assess, from a given ordered sample of a given random variable, the probability of events that are more extreme than any previously observed. Extreme value analysis is widely used in many disciplines, such as structural ...

### **Extreme value theory - Wikipedia**

Extreme E is a FIA-sanctioned international off-road racing series that uses spec electric SUVs to race in remote parts of the world, such as the Amazon rainforest or the Arctic. All racing locations are chosen to raise awareness for some aspects of climate change and Extreme E maintains a "Legacy Programme" which intends to provide social and environmental support for those locations.

In 1958, Gumbel published a key book on the topic of statistics of extremes. He derived and analyzed the probability distribution that is now known as the Gumbel distribution in his honor. When he died, Gumbel's papers were made a part of The Emil J. Gumbel Collection, Political Papers of an Anti-Nazi Scholar in Weimar and Exile. These papers include reels of microfilm that document his activities against the Nazis.
