subset of Artificial  
Intelligence. ML is a  
science of designing  
and applying  
algorithms that are  
able to learn things  
from past cases. If  
some behaviour exists  
in past, then you may  
predict if or it can  
happen again.

(AI) and machine learning (ML) provide us with the capabilities of making the most of this new digital era.

Apart from the public perception of science fiction-like applications of AI/ML such as robots, there are a lot of practical applications with the aim of reducing costs, increasing benefits, optimising resources and improving the accuracy of decisions.
