The Al Ko Amc Chassis

The AL-KO AMC CHASSIS was designed to meet the wishes of holidaymakers and the requirements of motorhome manufacturers. One of the major benefits is the innovative lightweight technology that makes the AMC CHASSIS significantly lighter without affecting the outstanding stability of the frame.

AL-KO AMC Light Weight Chassis
AL-KO has manufactured many thousands of vehicles over almost 40 years of building chassis conversions, its torsion bar axle being almost unique within the leisure industry. But how does it work? As the wheel passes over a bump, the torsion bars within the axle tube (basically a metal rod) twist, returning to its original preset position as it is passed.

Fiat Ducato | AL-KO

When first introduced in the 1970s, a completed, manufacturer-supplied chassis had to be cut behind the driver's cab and a lightweight Al-Ko AMC assembly bolted on. Today, though, base vehicle manufacturers build the cab using dedicated chassis members supplied by Al-Ko and transport them back-to-back, i.e. chassis-less.

Behind the scenes at Al-Ko Kober - Practical Motorhome

An AL-KO AMC ladder chassis is strong and lightweighted and allows you to take off up to 50 kg compared to a comparable original chassis featuring leaf-spring rear suspensions: besides a definitely more pronounced automotive setting, with independent axle and wheel suspensions, the German company's products are provided with suitable ribbed and reinforced lightening millings as well as with all the holes needed to assemble the various chassis components.
