The Art of Irish Whiskey Distilling STEP 1 – MALTING Malted barley is a key component of whiskey production. Malted barley is produced by steeping raw barley in warm water for 40-60 hours at a temperature of 12-15 degrees in order to make the barley think it is spring time in its natural life cycle and the barley begins to germinate.

There are few books available that explore the actual craft of distilling in such detail. Most of the other spirits books chronicle the historical side of the distilling world or focus on the flavors of various vintages. This book, however, is the consummate insider's guide to distilling techniques.

### The Art of Distilling Whiskey - Austin Homebrew Supply

"Creating flavors and harmony for a product can be called art," they say, "however, creating the characteristic of each component whiskey is science." The philosophy and general approach to blending is unsurprisingly about the same at archrival Suntory, where combinations of grains, stills and barrel types allow the distillery to produce over 150 different styles of spirit from which to blend.
