The Systems View Of Life

The systems view of life is "a change from seeing the world as a machine to understanding it as a network" (p.4). Greek philosophy, in the sixth century BC, "understood the order of the cosmos to be that of a living organism" (p.5). The shift from an organic to a mechanistic worldview "was initiated by ...

The Systems View of Life

The systems view is all about connections and relationships, and it's about seeing the world as a living network, and not as a machine. This fundamental shift in perspective, seeing life as systems comprised of interconnected networks, is therefore a key concept. Moreover, the mayor problems of our time are all interconnected.
