within a few minutes.

This is often referred to by doctors as "sudden death" or "sudden cardiac death (SCD)."

Symptoms of sudden cardiac arrest include:

that your heart is  
skipping a beat,  
fluttering rapidly, or  
beating extremely fast.

## **Heart Skips a Beat: Understanding Heart Palpitations**

Another reason  
palpitations can be  
dangerous is that they  
can weaken the heart  
muscle. "Heart rhythm  
abnormalities, if they  
remain untreated and  
persist for weeks to  
months, can result in

However, while heart palpitations are usually not dangerous, it's still in your best interest to get your symptoms checked by a cardiologist if the problem persists. And if your palpitations are accompanied by other symptoms, such as dizziness or weakness, it could be a sign of a more serious condition that shouldn't be ignored.
